### [ISO/IEC TR 27016:2014](#) — Information technology — Security techniques — Information security management — Organisational economics (*first edition*)

#### Abstract

*"ISO/IEC TR 27016:2014 provides guidelines on how an organisation can make decisions to protect information and understand the economic consequences of these decisions in the context of competing requirements for resources. ISO/IEC TR 27016:2014 is applicable to all types and sizes of organisations and provides information to enable economic decisions in information security management by top management who have responsibility for information security decisions."*

#### Introduction

There are substantial economic/financial/resourcing aspects to the management of information risks and security controls.

#### Scope and purpose

The [ISO catalogue page](#) says this standard "provides guidelines on how an organisation can make decisions to protect information and understand the economic consequences of these decisions in the context of competing requirements for resources."

#### Status of the standard

The *first* edition was published in **2014** as a **Technical Report** since this was deemed a developing field of study.

Evidently the field has not developed since work on a *second* edition ground to a halt due to lack of inputs from committee members.
