ISO/IEC TR 27029 — Information security, cybersecurity and privacy protection — ISO/IEC 27002 relationship with ISO and IEC standards *[DRAFT]*

Numerous ISO and IEC standards reference and draw upon the information security controls catalogued in ISO/IEC 27002 (either directly or via ISO/IEC 27001 Annex A), hence whenever '27002 is updated, those other standards need to be checked and if necessary updated. The primary purpose of this standard was to identify which other standards are linked to ISO/IEC 27002, and hence where changes are likely to be needed whenever '27002 is updated.

This was originally destined to be published as a Technical Report but is now set to become an internal SC 27 Committee Document instead, possibly in conjunction with IEEE.
